

Australian Government

Department of the Environment and Energy

MEDIA RELEASE

14 November 2017

TAKING AUSTRALIAN CLEAN ENERGY EXPERTISE TO THE WORLD

Applications for the International Engagement Program funding round are now open.

The Australian Government, through the Australian Renewable Energy Agency (ARENA), has provided \$5 million to the program to support knowledge sharing about renewable energy technology with researchers and industry leaders around the world.

Funding will be awarded to activities that will help create, collect, analyse and store knowledge, as well as strengthen industry partnerships and collaboration through Mission Innovation and the International Energy Agency.

Research and industry leading experts are encouraged to apply to make the most of this unique opportunity to access cutting-edge knowledge, share ideas on new renewable technologies, and to meet renewable energy experts globally.

The International Engagement Program funding round opens 3 November 2017 and closes at 5pm (AEST) on 15 December 2017.
