

WHICH ARENA INDUSTRIAL TRANSFORMATION PROGRAM IS RIGHT FOR ME?

ARENA has two funding programs supporting industrial transformation. Both will consider a range of technology solutions targeting the reduction of Scope 1 and Scope 2 Greenhouse Gas emissions of Industrial Activity across Australia.

Industrial activity is defined as *'the manufacturing, production, processing of raw goods, products, or waste materials, including an associated distribution and storage of any such activities.'*

Specific eligibility requirements for each program can be found in the Program Guidelines.

Where a potential application is eligible for the ITS Program, applications will be considered under this Program. Applications that do not meet ITS eligibility criteria but which do meet NIT eligibility criteria, will be considered under the NIT Program.

POWERING THE REGIONS: INDUSTRIAL TRANSFORMATION STREAM (ITS) PROGRAM

\$400 million

About the program

Aims to support the reduction of industrial emissions at existing National Greenhouse Energy Reporting (NGER) industrial facilities in Regional Australia.

Target projects

- › Are to the direct benefit of an industrial facility which is under operational control of an entity which meets the Corporate Group Threshold for reporting under the **NGER Act**¹;
- › Will occur in [Regional Australia](#) (outside the Greater Capital City Statistical Areas including the Kwinana Industrial Area);
- › Address Scope 1 and/or Scope 2 emissions of existing Industrial Activity;
- › Contribute to the Program objectives.

Structure

- › Funding rounds supporting by Focus Areas (available on the Program [webpage](#)).

Timing

- › Open funding program
- › Rounds of specified duration
- › Funding available until funds exhausted (or otherwise updated at ARENA's discretion)

Funding

- › \$400 million total
- › Focus Area – Round 1 – \$150 million

NATIONAL INDUSTRIAL TRANSFORMATION (NIT) PROGRAM

\$40 million

About the program

Supporting the reduction of emissions related to Industrial Activity across Australia.

Target projects

- › Are to the direct benefit of an existing or planned industrial facility;
- › Take place anywhere in Australia;
- › Address Scope 1 and/or Scope 2 emissions;
- › Contribute to the Program objectives.

Structure

- › No specific Focus Areas or streams.

Timing

- › Open funding program
- › Funding available until funds are exhausted (or otherwise updated at ARENA's discretion)

Funding

- › \$40 million total
